COLOCATION AT SDC 2

For maximum reliability and interconnection of your business

SDC 2 is the newest data center of the Global telecom operator **Neterra**. It will open in **Q1 2022** in Sofia, Bulgaria. SDC 2 is located in the same campus as SDC 1, and its customers will use all the benefits of the already established business and telecommunications infrastructure - **connectivity with all existing customers of Neterra** and **access to high-speed, secure and redundant over 8000 international networks and routes.**

- Sofia, Bulgaria
- TIER 3+
- 1400 m2
- 2 x 2 MW

SDC 2 is **the fourth data center owned by Neterra** - an independent telecom with more than 25 years of history. All services can be replicated in an alternative geographical point by the various data centers of the company. Between the company's special centers, all services can be replicated in an alternative geographical location (so-called disaster recovery).

Businesses can also take advantage of the company's **wide portfolio** of **other telecommunications services,** relying on proactive **24/7 professional support.**

LOCATION, LOCATION, coLOCATION
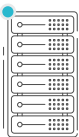

Benefits of a data center

- Keep focus on your core business, allowing us to take care of your equipment
- Have a reliable, uninterrupted and redundant service
- Save money on the purchase of specialized equipment and your own system support team
