

Neterra Omnia

Internet without excuses.

NETERRA

A next-generation hybrid network with up to 99.99% guaranteed availability - built for companies whose work stops the moment they go offline.

Always connected means always earning. We bring fiber, Starlink, 5G and more together into one intelligent service, managed from a single smart device.

99,99%
availability

The result: work that never stops, complete visibility, and the freedom to grow wherever you choose.

Run at full speed, around the clock.

Up to 99.99% guaranteed availability - transactions clear, machines keep running, your teams stay online.

Connectivity wherever your business goes - from head office to the furthest warehouse, site or vehicle.

Live in days, not months. We activate your connection within 7 working days - or in 24 to 48 hours when it can't wait.

Engineers on watch 24/7, keeping your network in perfect shape before problems ever reach you.

Innovation that works for you.

Most companies stake everything on one technology and one cable. We built something smarter. As a Starlink authorized reseller, we combine fiber, satellite internet (Starlink), 5G and any other telecom technology into a hybrid architecture with intelligent management. The moment one link fails, the system switches to another. Same IP address, no downtime, no interruption to your business.

THIS INTERNET IS BORING.

IT'S ALWAYS ON.

Designed for enterprises by

Who is it for?

Retail and chains.

Your POS terminals and online stores stay up and keep taking payments, 24/7.

Manufacturing and logistics.

A solid connection to every warehouse, site and vehicle – over Starlink, 5G, fiber and more.

Finance.

Secure, stable links to financial hubs across protected channels.

Healthcare.

Dependable connectivity for telemedicine and for critical procedures where downtime is not an option.

Media.

Fiber, 5G and satellite combined, for real-time video.

Multiple sites and branches.

One network across all your locations, managed centrally.

Why businesses choose Neterra?

Innovative hybrid architecture.

Several technologies, one service, and intelligent switching to keep your business online in any conditions.

Proven quality.

Named Best Connectivity Provider in CEE three years running - 2023, 2024 and 2025.

Guaranteed parameters.

The capacity we agree on is the minimum you get, never less.

Full transparency.

A customer portal with real-time monitoring of latency, speed and SLA compliance.

30+ years of experience, international reach.

A globally managed network behind every one of your sites.

Special terms for business clients:

- **One month free** on a 12-month contract.
- Order 10 locations - offices, stores or warehouses - **and one of them is free.**

Get the connectivity your business deserves.
