

NETERRA
telecommunications

neterra.net

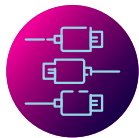

We are your global connectivity telecom solution provider and IT asset manager.

We are trusted by nine out of the 10 largest telecommunications companies in the world and nearly 1000 global enterprises.

We have been providing **international connectivity**, network management services, and security for almost **30 years** across our core network of over **220 locations** in **75+ countries**.

OUR CORE BUSINESS

Rated
Excellent

Global Connectivity, DIA & Starlink

We pride ourselves on providing reliable connectivity anywhere on the planet. Our services include Dedicated Internet Access (DIA) over premium fiber-optic networks, advanced and reliable satellite solutions, dark fiber, Intranet, and SD-WAN connectivity.

Neterra is an authorized reseller of Starlink by SpaceX – the cutting-edge high-speed satellite internet service powered by Low Earth Orbit satellites. We also offer traditional VSAT satellite connectivity. You can count on us for flawless connections and top-quality services, backed by a 99.99% SLA and 24/7 support from highly skilled engineers.

For companies operating in Sofia, we have built an entirely new, unified fiber-optic network, enhanced with XG-PON technology.

NetIX – Home of the Global Internet Exchange

NetIX is our next-generation Ethernet Exchange platform; its network accelerates the Internet and connects users faster, cheaper, and more directly than ever. The platform connects **200+ members** to content from **10,000+ visible networks** and **50+ Internet Exchanges** and reaches daily peaks of **more than 5 Tbps** of traffic throughput.

Via the GIX, NetIX members can simply use one port and one cross connect to access **50+ IXPs'** worth of data all under one contract, saving time, money, and effort.

60% of the world's top 25 ISPs are NetIX members.

NetIX's GIX service immediately enabled an Iraq-based ISP to climb **over 800 places** to become a global top **80 ISP** and helped a European network skyrocket **from the 25th position to the 8th** most connected network in the world.

Sofia Data Center

Neterra owns four independent (carrier neutral) data centers in Europe, built according to the standards of TIER III (Uptime Institute).

We are certified according to the international standards ISO 9001, ISO 27001, ISO 20000, ISO 27701, ISO 27018, ISO 22301, ISO 50001 and PCI DSS.

Our data centers offer **24/7 proactive support**, equipment colocation, high-performance servers for rent, latest generation **cloud solutions** and **IT services**, **direct connections** to the major global carriers and all BG ISPs, NetIX & many other exchanges, as well as two antenna fields for **satellite services**.

We can also provide a **white-labelled colocation solution** if you're looking to advertise your European availability.
