NETERRA CLOUD

IAAS - store and manage your data in a flexible and secure environment!

Neterra.Cloud will assist you in choosing the most appropriate and effective solution for your business case, needs, and planned budget. Your cloud servers or dedicated physical servers will be up and running in a matter of minutes. Save on unnecessary equipment and maintenance costs.

Cloud and dedicated servers one click away: client.neterra.cloud

NVMe Cloud Servers
Reduce the time to launch and expand your business!

- Pay only for what you use
- Create a server in less than a minute
- No long-term commitment
- Online access from anywhere in the world
- Scalable NVMe cloud servers with professional grade hardware and latest generation Intel processors.

Scalable cloud platform – use just the amount of resources you need!

DEDICATED SERVERS
Set up a physical server for less than 10 minutes!

- Servers with high quality components
- Two power modules to ensure work continuity
- Full remote access to your server via an IPMI controller with separate connectivity and a separate IP address
- No initial investment, only a fixed monthly fee
- A choice between a predefined or custom configuration
- 24/7 proactive support and monitoring of services
- Your own independent server (instead of shared hosting)
