

We are your **global connectivity and telecom solution provider**. We are trusted by some of the world's largest companies, as well as small and medium-sized businesses. We have been providing **international connectivity**, network management services, and security for almost **30 years** across our core network of over **200 locations** in **65+ countries**.

OUR CORE BUSINESS

Scan for more

Global Connectivity & DIA

Neterra provides **global connectivity to any point on earth** in the form of Internet access, VPN networks, creation of closed networks through the so-called SD-WAN technologies and more.

We also provide the so-called last mile access - **Dedicated Internet Access for companies, corporations, global telecom operators and large integrators** who want to have coverage all over the world.

NetIX – Home of the Global Internet Exchange

NetIX's next-generation network accelerates the Internet. It connects content creators with users faster, cheaper, and more directly than ever. The NetIX network stretches across more than **200 global** data centers in **65 cities** from **55 countries**. The platform connects **180+ members** to content from **9,000+** visible networks and **30+ Internet Exchanges** and reaches daily peaks of **more than 2 Tbps** of traffic throughput.

60% of the world's top 25 ISPs are NetIX members. NetIX's GIX service immediately enabled an Iraq-based ISP to climb over 800 places to become a global top 80 ISP.
