# CORPORATE NETWORK ETHERNET & IP VPN

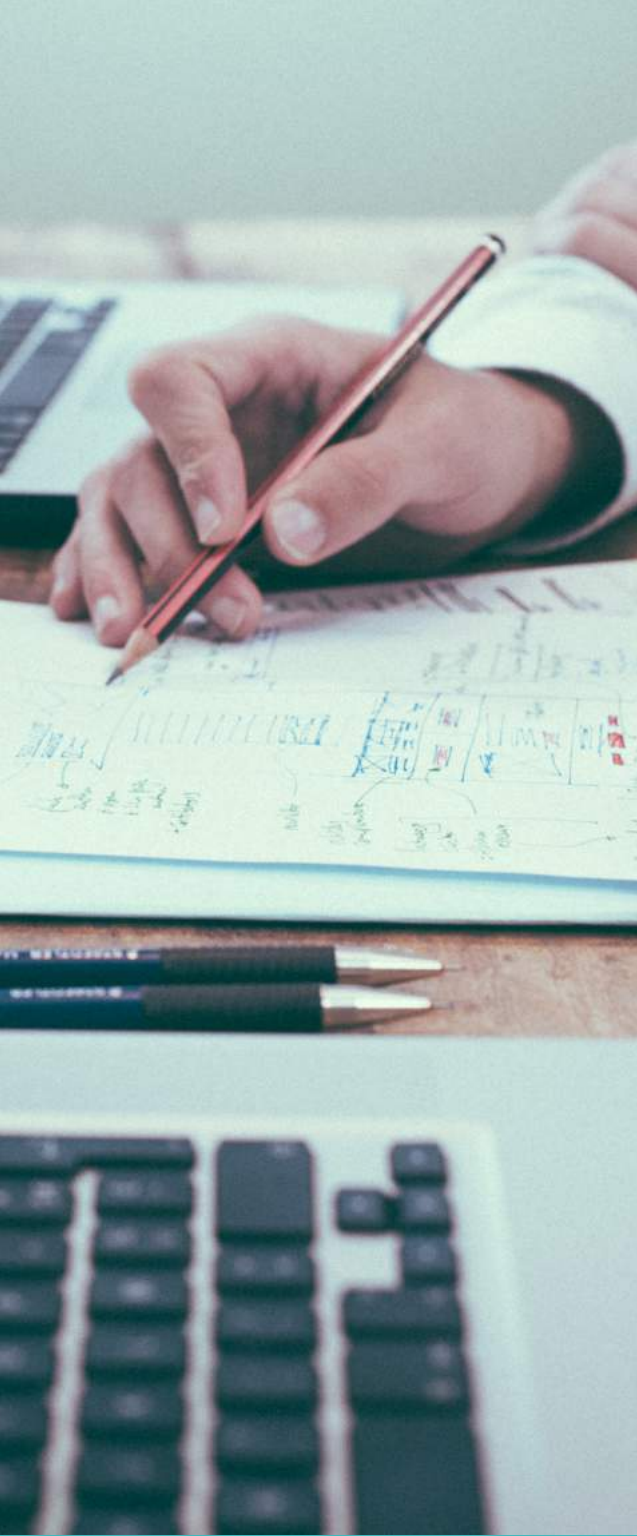

[WWW.NETERRA.NET](http://WWW.NETERRA.NET)

Neterra offers you complete family of solutions for big data transmission between your offices and other locations. The solution targets telecom operators and corporate clients sharing mutual resources.

## **WE OFFER:**

- Wide speed range;
- Low latency and low packet loss;
- Ethernet Services that meet the Metro Ethernet Forum's recommendations for (MEF 2.0) Carrier Ethernet Services.

## ETHERNET SERVICES ADVANTAGES:

- One physical interface gives access to several services;
- Low cost exchange of large amounts of information - speed up to 10Gbps;
- Applications environment where speed and packet loss are critical;
- Transparent transmission - gives you freedom to organize your IT infrastructure.

## VIRTUAL PRIVATE NETWORKS — IP VPN

IP VPN is virtual private network based on IP protocol, which ensures high quality and effective solution for connecting geographically distributed offices of a company into a single corporate network.

# IP VPN BENEFITS

- An optimal solution ensuring a reliable geographically distributed network;
- Low cost of end-user equipment;
- Speed up to 10Gbps;
- Maximum protection against unauthorized access and external malicious actions;
- Improve time for exchanging, managing and controlling information;
- Capacity reservation and traffic prioritization;
- Integration of various software applications.

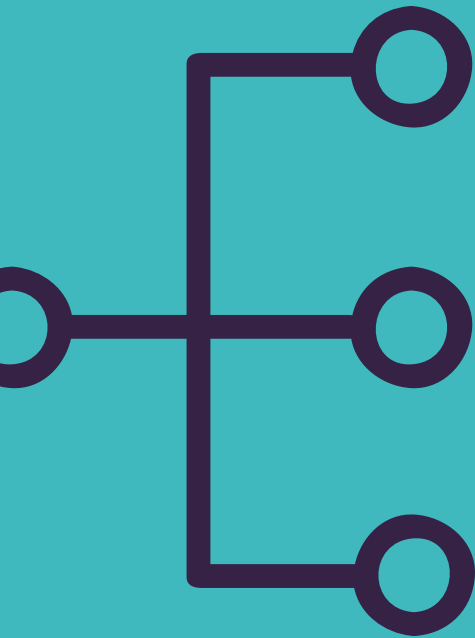

## ADDITIONAL OPTIONS FOR ETHERNET AND IP VPN SERVICES:

- Managed Services - Neterra delivers, installs, configures and maintains of equipment tailored to your needs upon request;
- Service protection- Neterra provides backup connectivity to your office.

# WHY IS NETERRA THE BEST PARTNER?

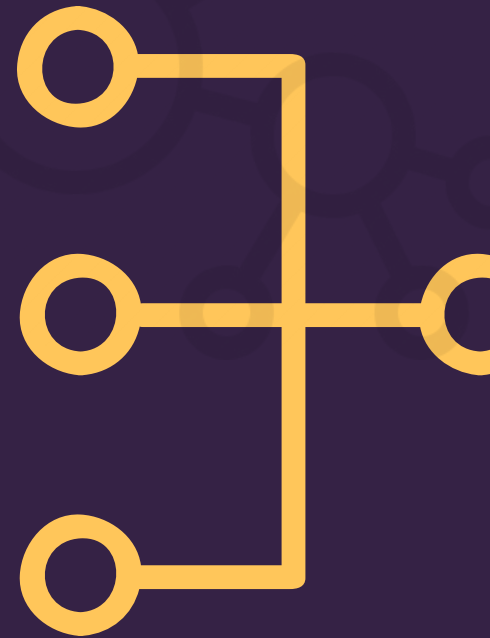

- Optical transmission environment for maximum quality;
- Fully redundant network to ensure continuity of service;
- We guarantee 99.9% availability of the services;
- Direct connectivity to the networks of over 1500 partners;
- 24/7 proactive service monitoring and support by Neterra's experienced team.

# WHY IS NETERRA THE BEST PARTNER?

- Web-based, automated monitoring system (Neterra Online Monitoring System);
- Notification of available issues, registration and recommendation to resolve them;
- Registration of actions taken to resolve them and to notify their status;
- Neterra's backbone is based on Multi-Protocol Label Switching (MPLS) technology, providing optimal customer solutions;
- One Stop Shop - a full range of telecom services.
