Managed Services

www.neterra.net

We created the Managed Services of Neterra with the sole aim to help you optimize and control your network resources, offering 24/7 professional support.

Now you can focus on your core business or think about your future plans. Our skilled team will take care of your services and equipment.

We offer:

- Installation, configuration and maintenance of different kinds of network equipment - routers, switches, Firewalls, WiFi devices etc.;
- 24/7 Professional and proactive monitoring of your services and systems;
- Hardware support of your equipment;
- Delivery and equipment installation + spare parts;
- Diagnostics and fixing software and hardware issues;
- Device configuration backup allowing fast restoration of information.

Advantages of your partnership with Neterra:

- We guarantee the level of support of every service;
- Cost reduction of technical support;
- Professional consultancy, design and implementation of flexible solution;
- Service Protection - Completely redundant systems;
- Online Monitoring System – permanent access to the services' status, detail and parameters;
- Early diagnostics and troubleshooting;
- One stop shop - full range of telecom services;
- Own carrier neutral data center (SDC) meeting the industry highest requirements.
