

Neterra.Cloud provides cloud and infrastructure solutions powered by Neterra –
a global connectivity provider with over 30 years of experience and its own data centers.

✓ 30+ years experience

✓ Global network in 75 countries

✓ 4 own data centers

✓ Certified infrastructure (ISO, GDPR)

Core Infrastructure Solutions

Store and Manage your data in a flexible and secure environment

Cloud Servers

Deploy scalable cloud infrastructure in minutes with flexible vCPU, RAM, and NVMe storage options - all with unlimited traffic.

Dedicated Servers

Rent physical servers in our Class 1 data centers for maximum control and dedicated performance.

Storage

Store and manage your data securely in our Tier III-compliant Sofia Data Center with high availability.

✓ High performance

✓ Full scalability

✓ 99,99%SLA

✓ Unlimited traffic

Data Security & Business Continuity

Keep your systems secure, available,
and resilient at all times.

- ✓ **Backup as a Service:** Protect your data with automated backups and ensure fast, reliable recovery from data loss.
- ✓ **DDoS Protection:** Stop malicious traffic from Layer 3 to Layer 7 while allowing legitimate traffic to reach your network seamlessly.
- ✓ **Managed Firewall:** Protect and manage network security with IPS, IDS, Content filtering, and Antivirus.

✓ Business continuity

✓ Advanced protection

✓ 24/7 security

Managed Services & IT Support

Focus on your business while we manage your infrastructure.

Active Monitoring & Response

Receive 24x7 monitoring with instant alerts and proactive protection.

Management Server

End-to-end management of your cloud and physical servers, ensuring early detection of issues before they turn into real business risks.

Software Rental

Quickly deploy a variety of licensed software directly on your Cloud and Dedicated servers.

Expert Assistance

Hire highly qualified system administrator as a service for specific projects or periods.

Managed Network Infrastructure

Complete network management - from design to ongoing support.

✓ Reduced IT workload

✓ Expert support

✓ Optimized performance

Why Neterra.Cloud

No on-site servers. No IT headaches. Full control. Cloud & IT team - 100% accountability.

- ✓ **Full Data Control:** Independent sovereign cloud with modern infrastructure. Physically stored in Bulgaria, ensuring ISO and GDPR compliance.
- ✓ **Global Network:** High-speed access via Tier-1 providers with low latency ensuring reliability for critical operations.
- ✓ **Flexible & Cost-Effective Infrastructure:** built for scalability, and flexibility – benefit from high performance without vendor lock-in or expensive licensing fees.

✓ Own infrastructure

✓ No vendor lock-in

✓ High performance

✓ 24/7 engineer support

Problems We Solve

Problem: Hardware Risks

Old servers lead to failures and high maintenance costs.

Solution: Move to Neterra.Cloud

Replace CapEx with predictable OpEx and reliable managed infrastructure.

Problem: Downtime

Outages disrupt operations and lead to lost customers.

Solution: Ensure High Availability

99.99% SLA and stable performance under any load.

Problem: Lack of IT Resources

Difficult hiring and overloaded internal teams.

Solution: Outsource Infrastructure Management

24/7 expert support and predictable monthly costs.

Problem: Fragmented Responsibility

Multiple vendors for infrastructure, cloud services, and support.

Solution: Single-Point Responsibility

A single trusted partner manages the entire stack.

Neterra.Cloud for Real Workloads

Development & Test

Cost-efficient infrastructure for personal projects, testing, and staging.

E-commerce & Business

Stable performance for online stores, corporate websites, and CRM systems - with unlimited traffic.

Databases & High-Load Systems

High-performance dedicated resources for databases, ERP systems, and applications.

Companies We Work With

- ✓ Growing SaaS and tech companies
- ✓ Enterprises requiring secure and reliable infrastructure
- ✓ Businesses with high availability and DDoS protection needs
- ✓ Organizations looking to outsource IT operations
- ✓ Small businesses and website owners (blogs, test environments)

“Neterra Cloud – We are using Neterra Cloud for more than 2 years and we are very happy! There are no issues. Everything is going smoothly. We recommend!”
