

# Internet Services

---

## ABOUT

Neterra provides access to the global Internet (full range of international routes). The service offers the most direct and guaranteed connectivity, symmetrical speed and is targeted to customers who need reliability and continuity of the Internet connection.

## Benefits of Neterra Internet Services:

- Fully guaranteed capacity;
- High-speed, secure and reliable service;
- Optical transmission media for maximum quality;
- Full range of international routes, using the principle of “the most direct connectivity”;
- Public static IP addresses;
- Symmetry - the same speed of inbound and outbound traffic.

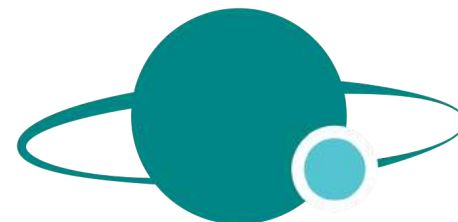

## Additional Services:

- Managed services - procurement, installation and support of equipment, tailored according to customer's needs.
- RIPE administration - Neterra as a LIR represents you in front of RIPE for registering private IP addresses and Autonomous System Numbers.
- DDoS - Neterra's solution provides strong and secure protection. It mitigates malicious traffic, carried out by multiple sources.
